

**ECE 3544: Digital Design I**  
**Project 2: Modeling the Timing of a Device**

Student Name: Jacob Abel

Honor Code Pledge: I have neither given nor received unauthorized assistance on this assignment.

---

---

**Grading: The design project will be graded on a 100 point basis, as shown below:**

*Manner of Presentation (30 points)*

- \_\_\_\_\_ Completed cover sheet included with report (5 points)
- \_\_\_\_\_ Organization: Clear, concise presentation of content; Use of appropriate, well-organized sections (15 points)
- \_\_\_\_\_ Mechanics: Spelling and grammar (10 points)

*Technical Merit (70 points)*

- \_\_\_\_\_ General discussion: *Did you describe the objectives in your own words? Did you discuss your conclusions and the lessons you learned from the assignment?* (5 points)
- \_\_\_\_\_ Design discussion: *Did you discuss your design approach, and the design decisions that you made as a part of implementing your modules?* (10 points)
- \_\_\_\_\_ Timing analysis discussion: *Did you determine the minimum clock period that allows correct operation of the system?* (5 points)
- \_\_\_\_\_ Testing discussion: *What was your approach to formulating your test benches? How did you verify the correctness of the modules you designed?* (10 points)
- \_\_\_\_\_ Supporting figures: *Waveforms showing the correct operation of the various modules, Waveforms demonstrating valid and invalid behavior of the system.* (20 points)
- \_\_\_\_\_ Supporting files: *Do the modules pass any tests applied by the grading staff? Modules whose declarations do not conform to the requirements of the project specification cannot be tested, and will receive no credit.* (20 points)
